IMPORT THE IMAGEDATAGENERATOR LIBRARY

Assignment Date	15 November 2022
Team ID	PNT2022TMID10879
Project Name	AI – Powered Nutrition Analyzer for Fitness Ethunsiasts

Image data augmentation is a technique that can be used to artificially expand the size of the training dataset by creating altered version of images in the dataset.

The Keras deep learning neural network Library provides the capability to fit models using image data generator via the image data generator class.

Let us import the image data generator class form Keras:

```python
from keras.preprocessing.image import ImageDataGenerator
```
